

SmartSignal — Gold Trading System

Private Consultation Invitation & Review Questions

1 · Who we are (in plain terms)

SmartSignal is a systematic, fully-documented gold (XAU/USD) trading model that has been **live since 22 June 2026** and is developed every day. It is **paper-traded only** and every trade is recorded with its entry, exit, and the reason behind each decision. **Errors are expected and are openly documented** — we fix them in the open rather than hide them. We are not selling anything and we are not looking for a deal. We are asking for an experienced eye.

2 · Verified track record (live, auto-updated)

Closed trades	89	Win rate	79.5%
Net points	+11,805	Profit factor	4.07
Best / Worst	+700 / -400	Avg trade	+133
Win streak	16	RR capture	43.2% (+1.01R / 2.33R)
Best session	Asia Morning +4,717 pts	Live page	smart-signal-lime.vercel.app

Full live ledger, daily & weekly reports: smart-signal-lime.vercel.app

3 · The invitation (no pitch, no offer)

*Hi — I respect your read of the market and the community you have built. I would value an experienced eye on my work. I'd like to give you **free access to my private signals channel for two weeks, exactly as it is** — nothing will be modified, and the trades are not sent to anyone else. I am not offering you anything and I will not pitch you. I simply want your honest opinion: what is missing, and how you see it. If, after seeing the numbers and the precision, you see a way we could work together, I am open to hearing **your** idea.*

4 · Review questions — your expert opinion

A · Targets (TP1 / TP2)

- Are our first and second targets placed at levels your audience actually respects?
- Do we take profit too early or too late relative to how gold really moves in each session?
- Which target structure would you trust enough to present to subscribers?

B · Stop-loss & protection

- Is our stop distance (150 pts floor) sensible for gold's volatility, in your experience?
- Does moving the stop to entry at TP1 feel credible, or does it look like over-protection?
- What stop behaviour would your audience forgive — and what would they never forgive?

C · Liquidity

- Do we read liquidity (sweeps, pools) the way your readers expect it to be read?
- Is anchoring targets to real liquidity pools a selling point or too technical to show?
- What liquidity concept resonates most with an English retail audience?

D · Day-maps & presentation

- How would you present a daily map to an English audience in one clear line?
- What is the first thing you would change about how the system is presented?
- What would your subscribers actually pay for here — signals, education, or transparency?
- If you ran this, what would you do differently in the first 30 days?

5 · A note on honesty

We publish our wins and our losses alike, and we state plainly that this is paper-trading for education — not financial advice. We believe that transparency is the only durable edge in this market. Thank you for your time and your honest read.
